medical devices

CONNECTION CABLES

GENERAL INFORMATION

Intended use: Transfer of biological signals picked up by the electrode to the recording machine.

Instructions for use: Connect the cable to the electrode and the recording machine.

Cleaning instructions: Wash with cold water and soap with pH 5,5.

Disinfection: Disinfect using validated processes either Amocid, Lysoformin, Alhyndex, IndicinGG or equivalent products, at high concentration too, without immersing the device into the liquids. Use products according to directives and regulations of the country in which the device is used.

Sterilization: NO STERILE device. If necessary, sterilize with validated processes for ETO or Gamma Ray sterilization.

Lifetime: After 5 years from sale, is not guaranteed the proper functionality of the device.

Storage: Particular precautions for storing are not necessary but it's best to put the electrodes in its box after washing.

Packaging: plastic pouch.

Contraindications and interactions: none.

Declared toxicity: none. LATEX FREE

Transport and Waste disposal: Any particular transport condition and waste disposal is expected.

Regulation: Class I device.

Comply with the MDD 93/42/CEE (D.L. 46/97) and manufactured according to the procedures of BIONEN Quality System certified ISO 13485.
